Notes:

- Span Tables are based upon 40/10 Continuous Span loading with a deflection of L/480
- Span Tables are based upon 23/32" OSB Glued and Nailed
- Span Tables are based upon secondary span beyond those listed in inches = (d x .505) where (d) equals depth of I-joist
- Span Tables listed above may be increased with secondary span uplift restraint from design professional
- Span Tables listed above are clear span of I-joist. Inside face of bearing to inside face of bearing.
